Intune Documentation

SAMPLE REPORT, FICTIONAL TENANT

Technical Evidence Report: Intune Configuration

Essential Eight ML1

November 2023; target Maturity Level 1

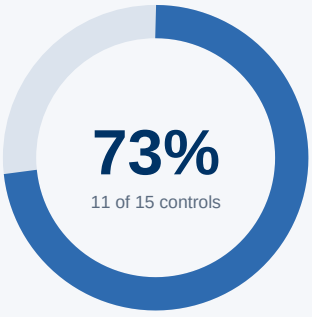
Evidence matrix for selected assessment points, read from the Microsoft Intune configuration

TENANT

Contoso Ltd

Report date **2026-10-08**

Classification **Internal**



Controls with supporting technical evidence

Supporting evidence only, not a compliance score

AT A GLANCE

Supporting or partial evidence	11
No recognized evidence	3
Mixed policy evidence	1

Evidence is read from the Microsoft Intune configuration export on the report date and mapped using ruleset 2026.10.22. Organizational aspects of each control are listed separately for review.

01 EXECUTIVE SUMMARY

Summary

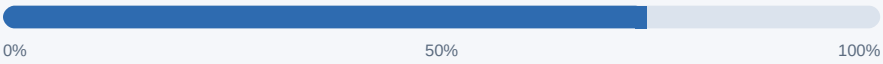
73%

CONTROLS WITH TECHNICAL EVIDENCE

11 of 15 assessable controls have supporting technical evidence in the Intune configuration.

9 of 15 technical safeguards are set up and switched on in Intune and Entra.

0 of 15 selected controls with configuration evidence (11 partial)
15 in scope; 0 outside the selected scope; 0 not assessed; 1 mixed policy evidence. Entries are selected mappings, not full framework coverage.



WITH TECHNICAL EVIDENCE	SAFEGUARDS IN PLACE	NO RECOGNIZED EVIDENCE	MIXED POLICY EVIDENCE
11	9	3	1
0 configuration, 11 supporting or partial	of 15 mapped, set up and switched on	controls without recognized evidence	controls with mixed policy evidence

Status distribution

15 controls

11 Supporting or partial evidence, 73% **3** No recognized evidence, 20% **1** Mixed policy evidence, 7%

Coverage by family

controls with technical evidence

Application control	**0** of 2
Multi-factor authentication	**4** of 4
Patch operating systems	**0** of 1
Restrict Microsoft Office macros	**3** of 4

1 more family is listed in the results overview.

Assigned deviating configurations: 2.
At least one assigned policy explicitly contradicts the target configuration.

Configured settings without assignment: 1.
The detected target configuration is not effective until it is assigned.

Key findings

ordered by severity, then control

Assigned deviation ML1-MAC-03

Office macro runtime scanning for all documents
Assigned deviating configuration affects ML1-MAC-03.

Assigned deviation ML1-PO-07 See page 5

Quality update timing within 14 days
Assigned deviating configuration affects ML1-PO-07.

Not assigned ML1-AC-01 **Application control in enforcement mode: Configured setting without assignment affects ML1-AC-01.**

SCOPE NOTE

This report documents technical evidence from the tenant's Microsoft Intune configuration. It is not a compliance certification and does not replace an audit. Missing evidence means that no supported configuration with a known assignment was detected in the evaluated dataset.

48 published requirement entries; showing 15 with Intune or Conditional Access policy checks. Operational-only requirements are excluded. Target level only; achieved maturity is not assessed.

02 RESULTS

Results Overview

Each selected control, its rolled up status, how many of its capabilities are evidenced, and where the supporting evidence is recorded.

CONTROL	STATUS	CAPABILITIES	EVIDENCE	PAGE
Application control				0 of 2 with evidence
ML1-AC-01 Application control	No recognized evidence	0 of 1	1 evidence item	n/a
ML1-AC-03 Application control	No recognized evidence	0 of 1	None recorded	n/a
Multi-factor authentication				4 of 4 with evidence
ML1-MFA-01 Multi-factor authentication	Supporting or partial evidence	1 of 1	1 evidence item	n/a
ML1-MFA-02 Multi-factor authentication	Supporting or partial evidence	1 of 1	1 evidence item	n/a
ML1-MFA-03 Multi-factor authentication	Supporting or partial evidence	1 of 1	1 evidence item	n/a
ML1-MFA-07 Multi-factor authentication	Supporting or partial evidence	1 of 1	1 evidence item	n/a
Patch operating systems				0 of 1 with evidence
ML1-PO-07 Patch operating systems	Mixed policy evidence	0 of 1	E-003 E-004	5
Restrict Microsoft Office macros				3 of 4 with evidence
ML1-MAC-01 Restrict Microsoft Office macros	Supporting or partial evidence	1 of 2	E-001 E-002	4
ML1-MAC-02 Restrict Microsoft Office macros	Supporting or partial evidence	1 of 1	3 evidence items	n/a
ML1-MAC-03 Restrict Microsoft Office macros	No recognized evidence	0 of 1	1 evidence item	n/a
ML1-MAC-04 Restrict Microsoft Office macros	Supporting or partial evidence	1 of 1	5 evidence items	n/a
User application hardening				4 of 4 with evidence
ML1-UAH-01 User application hardening	Supporting or partial evidence	1 of 1	1 evidence item	n/a
ML1-UAH-02 User application hardening	Supporting or partial evidence	1 of 1	1 evidence item	n/a
ML1-UAH-03 User application hardening	Supporting or partial evidence	1 of 2	1 evidence item	n/a
ML1-UAH-04 User application hardening	Supporting or partial evidence	1 of 1	2 evidence items	n/a

11 Supporting or partial evidence **3** No recognized evidence **1** Mixed policy evidence

Sample report: detail pages are included for selected controls only (ML1-MAC-01, ML1-PO-07). A full report includes a detail page for every control.

03 CONTROL DETAIL

ML1-MAC-01

Supporting or partial evidence | Target Maturity Level 1

Restrict Microsoft Office macros

2 match, 1 missing, 0 different

Microsoft Office macros are disabled for users that do not have a demonstrated business requirement.

1 of 2 capabilities

2 evidence references

Office VBA macros disabled Windows

Setting configured and assigned

CHECK	EXPECTED	ACTUAL	RESULT
user_vendor_msft_policy_config_excel16v2~policy~l_microsoftofficeexcel~l_exceloptions~l_security~l_trustcenter_l_vbawarningspolicy_l_empty4 WIN - Office - Macro security	"Disable all without notification"; requires VBA Macro Notification Settings (User): Enabled	**"Disable all without notification"**	Matches expected value
user_vendor_msft_policy_config_word16v2~policy~l_microsoftofficeword~l_wordoptions~l_security~l_trustcenter_l_vbawarningspolicy_l_empty19 WIN - Office - Macro security	"Disable all without notification"; requires VBA Macro Notification Settings (User): Enabled	**"Disable all without notification"**	Matches expected value

POLICY **WIN - Office - Macro security** Assigned: Group: All Corporate Users

EVIDENCE E-001 E-002

Office VBA macros disabled on macOS macOS

No evidence

CHECK	EXPECTED	ACTUAL	RESULT
Office VBA macros disabled on macOS macos-office-macros-disabled	"True"; alternative: "Disable all macros"	*Not found*	Missing

No supported setting was found after checking the collected policies.

POLICY No matching policy found

EVIDENCE None recorded

▲ Additional verification: not assessed by technical evidence

Review business exceptions, assigned users and coverage of every Office application; only the detected settings are evidenced.

Review macOS profile coverage, business exceptions and installed Office applications.

ML1-PO-07

Mixed policy evidence | Target Maturity Level 1

Patch operating systems

1 match, 0 missing, 1 different

Patches, updates or other vendor mitigations for vulnerabilities in operating systems of workstations, non-internet-facing servers and non-internet-facing network devices are applied within one month of release.

0 of 1 capabilities

2 evidence references

Quality update timing within 14 days Windows

Mixed policy evidence

CHECK	EXPECTED	ACTUAL	RESULT
Quality update timing within 14 days qualityUpdateDeadline WIN - Update ring Pilot	Automatic installation; not paused; deferral + deadline + grace at most 14 days (supporting threshold)	**Quality update deferral 0d + deadline 2d + grace 1d = 3d; paused: true**	Different value
Quality update timing within 14 days qualityUpdateDeadline WIN - Update ring Broad	Automatic installation; not paused; deferral + deadline + grace at most 14 days (supporting threshold)	**Quality update deferral 7d + deadline 5d + grace 2d = 14d; paused: false**	Matches expected value

POLICY **WIN - Update ring Pilot** Assigned: Group: Pilot Devices

POLICY **WIN - Update ring Broad** Assigned: Group: All Corporate Devices

EVIDENCE E-003 E-004

Risk E-003: WIN - Update ring Pilot sets qualityUpdateDeadline to Quality update deferral 0d + deadline 2d + grace 1d = 3d; paused: true (assigned).
Deviating configuration detected and assigned (risk).

Additional verification: not assessed by technical evidence

Windows update settings support scheduling only. Release-to-install timing, vulnerability scans, servers and network devices are unassessed.

Mixed policy evidence. Review profile settings and targeting overlap; a device conflict has not been established.

HOW TO READ THIS REPORT

Configuration evidence	Technical configuration evidence detected
Supporting or partial evidence	Technical configuration evidence partially detected
No recognized evidence	No supported technical configuration evidence detected
Mixed policy evidence	Mixed policy evidence
Not assessed	Not assessed
Outside selected scope	Outside selected scope

1. Status is shown by marker shape and label, never by colour alone.
2. A control rolls up from its capabilities. A capability rolls up from its checks.
3. Only assigned policies count as evidence. Configured but unassigned settings are reported separately.
4. Evidence references point to rows of the evidence register in Appendix A.

APPENDIX A

Appendix A: Evidence Register

Every configuration value cited in this report, as read from the tenant export. References are stable within a report ID.

Referenced assessment points for each item of evidence are listed in the relevant sections.

ANNEX

Policy device status

Device counts as summarised by Intune for the device policies cited in this report. Context only: no status in this report depends on them, and they do not show the state of an individual device. Errors include devices reported as not compliant. No status reported means the Intune summary has no row for the policy, not a count of zero.

Status summaries read on 2026-10-08T09:00:00Z. Configuration report: collected. Compliance report: collected. Profile status overview: collected.

POLICY	SOURCE	SUCCEEDED	ERRORS	CONFLICTS	NOT APPLICABLE	PENDING
WIN - Office - Macro security	Configuration report	**398**	**0**	**4**	**21**	**n/a**
WIN - Update ring Pilot	Profile status overview	*No status reported*				
WIN - Update ring Broad	Profile status overview	*No status reported*				

APPENDIX B

Methodology

Evidence is determined exclusively from concrete Intune settings: An assessment point is considered technically evidenced only when a recognized setting is configured with a recognized value and the policy is assigned. Configurations that explicitly contradict the target state are reported separately. Unsupported settings or settings that cannot be mapped unambiguously remain unassessed. Organizational requirements are not part of this automated technical assessment and must be assessed separately.

Note: Evidence against target Maturity Level 1; no achieved maturity level is calculated. Only entries with Intune or Conditional Access policy checks are displayed. Operational-only requirements are excluded. Local ML identifiers identify rows within the published appendix and are not official ISM control IDs. Australian Signals Directorate, © Commonwealth of Australia 2026. CC BY 4.0. Requirement text reproduced from Appendices A to C; local identifiers added by IntuneDocumentation and are not official ISM identifiers. Licence: https://creativecommons.org/licenses/by/4.0/ Configuration evidence does not prove implementation effectiveness, patch installation, backup recovery or operational processes. The model targets enterprise IT; mobile and operational technology coverage must be assessed separately.
