Intune Documentation

SAMPLE REPORT, FICTIONAL TENANT

Technical Evidence Report: Intune Configuration

Cyber Essentials

Requirements for IT infrastructure v3.3 (April 2026)

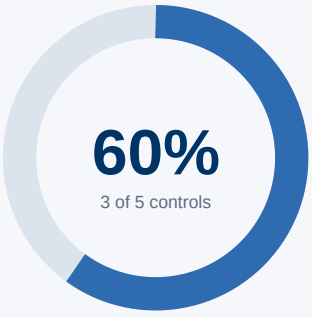

Evidence matrix for selected assessment points, read from the Microsoft Intune configuration

TENANT

Contoso Ltd

Report date **2026-10-08**

Classification **Internal**

Controls with supporting technical evidence

Supporting evidence only, not a compliance score

AT A GLANCE

Supporting or partial evidence	3
No recognized evidence	1
Mixed policy evidence	1

Evidence is read from the Microsoft Intune configuration export on the report date and mapped using ruleset 2026.10.5. Organizational aspects of each control are listed separately for review.

DOCUMENT CONTROL

Framework **NCSC Cyber Essentials Requirements for IT infrastructure v3.3 (April 2026)**		Tenant **Contoso Ltd**	Prepared for **Information Security**
Prepared by **Endpoint Engineering**	Report ID **IDOC-CE-20261008-CTSO**	Revision **1.0**	Ruleset version **2026.10.5**
Classification **Internal**	Report date **2026-10-08**		

01 EXECUTIVE SUMMARY

Summary

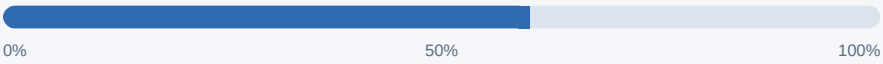

60%

CONTROLS WITH TECHNICAL EVIDENCE

3 of 5 assessable controls have supporting technical evidence in the Intune configuration.

28 of 43 technical safeguards are set up and switched on in Intune.

0 of 5 selected controls with configuration evidence (3 partial)
5 in scope; 0 outside scope; 0 not assessed; 1 mixed policy evidence. Entries are selected mappings, not full framework coverage.

WITH TECHNICAL EVIDENCE	SAFEGUARDS IN PLACE	NO RECOGNIZED EVIDENCE	MIXED POLICY EVIDENCE
3	28	1	1
0 configuration, 3 supporting or partial	of 43 mapped, set up and switched on	controls without recognized evidence	controls with mixed policy evidence

Status distribution

5 controls

3 Supporting or partial evidence, 60% 1 No recognized evidence, 20% 1 Mixed policy evidence, 20%

Coverage by family

controls with technical evidence

Technical control themes		3 of 5

Assigned deviating configurations: 3.
At least one assigned policy explicitly contradicts the target configuration.

Configured settings without assignment: 3.
The detected target configuration is not effective until it is assigned.

Key findings

ordered by severity, then control

Assigned deviation · Secure configuration

Diagnostic data minimized (Windows)
Assigned deviating configuration affects Secure configuration.

Assigned deviation · Malware protection

Office macro runtime scanning for all documents
Assigned deviating configuration affects Malware protection.

Assigned deviation · Security update management — **Quality update timing within 14 days: Assigned deviating configuration affects Security update management.** See page 5

Not assigned · Firewalls — **Host firewall (Windows Firewall): Configured setting without assignment affects Firewalls.** See page 4

Not assigned · Secure configuration — **System Integrity Protection: Configured setting without assignment affects Secure configuration.**

1 further finding is listed in the full report.

SCOPE NOTE

This report documents technical evidence from the tenant's Microsoft Intune configuration. It is not a compliance certification or an IT Grundschutz check and does not replace an audit. Missing evidence means that no supported configuration with a known assignment was detected in the evaluated dataset.

Note: Device-management evidence for the five Cyber Essentials control themes. Contains public sector information licensed under the Open Government Licence v3.0. Evidence here does not indicate Cyber Essentials certification.

02 RESULTS

Results Overview

Each selected control, its rolled up status, how many of its capabilities are evidenced, and where the supporting evidence is recorded.

CONTROL	STATUS	CAPABILITIES	EVIDENCE	PAGE
Technical control themes			3 of 5 with evidence	
Firewalls	No recognized evidence	0 of 2	E-001 E-002 E-003	4
Malware protection	Supporting or partial evidence	4 of 8	9 evidence items	n/a
Secure configuration	Supporting or partial evidence	16 of 23	20 evidence items	n/a
Security update management	Mixed policy evidence	5 of 6	E-004 E-005 +6	5
User access control	Supporting or partial evidence	8 of 10	8 evidence items	n/a

3 Supporting or partial evidence **1** No recognized evidence **1** Mixed policy evidence

Sample report: detail pages are included for selected controls only (Firewalls, Security update management). A full report includes a detail page for every control.

HOW TO READ THIS REPORT

Configuration evidence	Technical configuration evidence detected
Supporting or partial evidence	Technical configuration evidence partially detected
No recognized evidence	No supported technical configuration evidence detected
Mixed policy evidence	Mixed policy evidence
Not assessed	Not assessed
Outside selected scope	Outside selected scope

1. Status is shown by marker shape and label, never by colour alone.
2. A control rolls up from its capabilities. A capability rolls up from its checks.
3. Only assigned policies count as evidence. Configured but unassigned settings are reported separately.
4. Evidence references point to rows of the evidence register in Appendix A.

ABOUT THE METHOD

Methodology

Evidence is determined exclusively from concrete Intune settings: An assessment point is considered technically evidenced only when a recognized setting is configured with a recognized value and the policy is assigned. Configurations that explicitly contradict the target state are reported separately. Unsupported settings or settings that cannot be mapped unambiguously remain unassessed. Organizational requirements are not part of this automated technical assessment and must be assessed separately.

03 CONTROL DETAIL

Firewalls

No recognized evidence

Firewalls

3 match, 1 missing, 0 different

0 of 2 capabilities

3 evidence references

Host firewall (Windows Firewall) Windows

Setting configured, but not assigned

CHECK	EXPECTED	ACTUAL	RESULT
Enable Domain Network Firewall vendor_msft_firewall_mdmstore_domainprofile_enablefirewall WIN - Defender Firewall - All profiles	True "vendor_msft_firewall_mdmstore_domainprofile_enablefirewall_true"	**True** "vendor_msft_firewall_mdmstore_domainprofile_enablefirewall_true"	Matches expected value
Enable Private Network Firewall vendor_msft_firewall_mdmstore_privateprofile_enablefirewall WIN - Defender Firewall - All profiles	True "vendor_msft_firewall_mdmstore_privateprofile_enablefirewall_true"	**True** "vendor_msft_firewall_mdmstore_privateprofile_enablefirewall_true"	Matches expected value
Enable Public Network Firewall vendor_msft_firewall_mdmstore_publicprofile_enablefirewall WIN - Defender Firewall - All profiles	True "vendor_msft_firewall_mdmstore_publicprofile_enablefirewall_true"	**True** "vendor_msft_firewall_mdmstore_publicprofile_enablefirewall_true"	Matches expected value

POLICY **WIN - Defender Firewall - All profiles** Not assigned

EVIDENCE E-001 E-002 E-003

Host firewall (macOS) macOS

No evidence

CHECK	EXPECTED	ACTUAL	RESULT
Host firewall (macOS) macos-firewall	true true; alternative: true	*Not found*	Missing

No supported setting was found after checking the collected policies.

POLICY No matching policy found

EVIDENCE None recorded

Additional verification: not assessed by technical evidence

Network boundaries, allowed traffic, default-deny rules and effective device coverage require review.

Security update management

Mixed policy evidence

Security update management

7 match, 0 missing, 1 different

5 of 6 capabilities

8 evidence references

Quality update timing within 14 days Windows

Mixed policy evidence

CHECK	EXPECTED	ACTUAL	RESULT
Quality update timing within 14 days qualityUpdateDeadline WIN - Update ring Pilot	Automatic installation; not paused; deferral + deadline + grace at most 14 days (supporting threshold)	**Quality update deferral 0d + deadline 2d + grace 1d = 3d; paused: true**	Different value
Quality update timing within 14 days qualityUpdateDeadline WIN - Update ring Broad	Automatic installation; not paused; deferral + deadline + grace at most 14 days (supporting threshold)	**Quality update deferral 7d + deadline 5d + grace 2d = 14d; paused: false**	Matches expected value

POLICY **WIN - Update ring Pilot** Assigned: Group: Pilot Devices

POLICY **WIN - Update ring Broad** Assigned: Group: All Corporate Devices

EVIDENCE E-004 E-005

Risk E-004: WIN - Update ring Pilot sets qualityUpdateDeadline to Quality update deferral 0d + deadline 2d + grace 1d = 3d; paused: true (assigned).
Deviating configuration detected and assigned (risk).

Automatic updates (Windows Update) Windows

Setting configured and assigned

CHECK	EXPECTED	ACTUAL	RESULT
Automatic Update Mode automaticUpdateMode WIN - Update ring Pilot	"autoInstallAtMaintenanceTime" or "autoInstallAndRebootAtMaintenanceTime" or "autoInstallAndRebootAtScheduledTime" or "autoInstallAndRebootWithoutEndUserControl"	**"autoInstallAtMaintenanceTime"**	Matches expected value
Automatic Update Mode automaticUpdateMode WIN - Update ring Broad	"autoInstallAtMaintenanceTime" or "autoInstallAndRebootAtMaintenanceTime" or "autoInstallAndRebootAtScheduledTime" or "autoInstallAndRebootWithoutEndUserControl"	**"autoInstallAtMaintenanceTime"**	Matches expected value

POLICY **WIN - Update ring Pilot** Assigned: Group: Pilot Devices

POLICY **WIN - Update ring Broad** Assigned: Group: All Corporate Devices

EVIDENCE E-006 E-007

Minimum OS version (Windows) Windows

Compliance requirement assigned

A minimum version is configured; whether it is current is not assessed.

CHECK	EXPECTED	ACTUAL	RESULT
OS Minimum Version osMinimumVersion WIN - Compliance - Baseline	A non-empty string	**"10.0.22631"**	Matches expected value

POLICY **WIN - Compliance - Baseline** Assigned: Group: All Corporate Devices

EVIDENCE E-008

Compliance requirement, not an observed device state. Marks noncompliant after 24 hours. Resource access depends on applicable Conditional Access policies; effective access is unverified.

Security update management (continued)

Minimum OS version (macOS) macOS

Compliance requirement assigned

A minimum version is configured; whether it is current is not assessed.

CHECK	EXPECTED	ACTUAL	RESULT
OS Minimum Version osMinimumVersion MAC - Compliance - Baseline	A non-empty string	**"14.6"**	Matches expected value

POLICY **MAC - Compliance - Baseline** Assigned: Group: Corporate Mac Devices

EVIDENCE E-009

Compliance requirement, not an observed device state. Marks noncompliant after 24 hours. Resource access depends on applicable Conditional Access policies; effective access is unverified.

Minimum OS version (iOS/iPadOS) iOS

Compliance requirement assigned

A minimum version is configured; whether it is current is not assessed.

CHECK	EXPECTED	ACTUAL	RESULT
OS Minimum Version osMinimumVersion iOS - Compliance - Baseline	A non-empty string	**"17.6"**	Matches expected value

POLICY **iOS - Compliance - Baseline** Assigned: Group: Corporate Mobile Devices

EVIDENCE E-010

Compliance requirement, not an observed device state. Marks noncompliant after 24 hours. Resource access depends on applicable Conditional Access policies; effective access is unverified.

Minimum OS version (Android) Android

Compliance requirement assigned

A minimum version is configured; whether it is current is not assessed.

CHECK	EXPECTED	ACTUAL	RESULT
OS Minimum Version osMinimumVersion AND - Compliance - Work profile	A non-empty string	**"13.0"**	Matches expected value

POLICY **AND - Compliance - Work profile** Assigned: Group: Corporate Mobile Devices

EVIDENCE E-011

Compliance requirement, not an observed device state. Marks noncompliant after 24 hours. Resource access depends on applicable Conditional Access policies; effective access is unverified.

▲ Additional verification: not assessed by technical evidence

Actual release-to-install timing, supported software and application updates are unassessed. A configured version floor does not prove support.

A minimum version is configured; whether it is current is not assessed.

Mixed policy evidence. Review profile settings and targeting overlap; a device conflict has not been established.

APPENDIX A

Appendix A: Evidence Register

Every configuration value cited in this report, as read from the tenant export. References are stable within a report ID.

Referenced assessment points for each item of evidence are listed in the relevant sections.

ANNEX

Policy device status

Device counts as summarised by Intune for the device policies cited in this report. Context only: no status in this report depends on them, and they do not show the state of an individual device. Errors include devices reported as not compliant. No status reported means the Intune summary has no row for the policy, not a count of zero.

Status summaries read on 2026-10-08T09:00:00Z. Configuration report: collected. Compliance report: collected. Profile status overview: collected.

POLICY	SOURCE	SUCCEEDED	ERRORS	CONFLICTS	NOT APPLICABLE	PENDING
