Intune Documentation

SAMPLE REPORT, FICTIONAL TENANT

Technical Evidence Report: Intune Configuration

# SOC 2

## Trust Services Criteria

Evidence matrix for selected assessment points, read from the Microsoft Intune configuration

TENANT

**Contoso Ltd**

Report date **2026-10-08**

Classification **Internal**

**Controls with supporting technical evidence**

Supporting evidence only, not a compliance score

### AT A GLANCE

| | |
|---|---|
| Supporting or partial evidence | 3 |
| No recognized evidence | 1 |
| Mixed policy evidence | 1 |

Evidence is read from the Microsoft Intune configuration export on the report date and mapped using ruleset 2026.10.5. Organizational aspects of each control are listed separately for review.

01 EXECUTIVE SUMMARY

# Summary

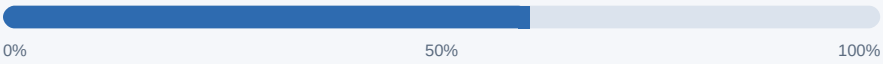
**60%**

CONTROLS WITH TECHNICAL EVIDENCE

**3 of 5 assessable controls have supporting technical evidence in the Intune configuration.**

34 of 50 technical safeguards are set up and switched on in Intune.

0 of 5 selected controls with configuration evidence (3 partial)
5 in scope; 0 outside scope; 0 not assessed; 1 mixed policy evidence. Entries are selected mappings, not full framework coverage.



| WITH TECHNICAL EVIDENCE | SAFEGUARDS IN PLACE | NO RECOGNIZED EVIDENCE | MIXED POLICY EVIDENCE |
|---|---|---|---|
| 3 | 34 | 1 | 1 |
| 0 configuration, 3 supporting or partial | of 50 mapped, set up and switched on | controls without recognized evidence | controls with mixed policy evidence |

## Status distribution

5 controls

**3** Supporting or partial evidence, 60% **1** No recognized evidence, 20% **1** Mixed policy evidence, 20%

## Coverage by family

controls with technical evidence

| | | |
|---|---|---|
| CC6 | | **3** of 4 |
| CC7 | | **0** of 1 |

**Assigned deviating configurations: 3.**
At least one assigned policy explicitly contradicts the target configuration.

**Configured settings without assignment: 3.**
The detected target configuration is not effective until it is assigned.

## Key findings

ordered by severity, then control

Assigned deviation CC6.7 See page 5

**Diagnostic data minimized (Windows)**
Assigned deviating configuration affects CC6.7.

Assigned deviation CC6.8

**Office macro runtime scanning for all documents**
Assigned deviating configuration affects CC6.8.

Assigned deviation CC7.1 **Quality update timing within 14 days: Assigned deviating configuration affects CC7.1.**

Not assigned CC6.6 **Host firewall (Windows Firewall): Configured setting without assignment affects CC6.6.** See page 4

Not assigned CC6.8 **System Integrity Protection: Configured setting without assignment affects CC6.8.**

*1 further finding is listed in the full report.*

**SCOPE NOTE**

This report documents technical evidence from the tenant's Microsoft Intune configuration. It is not a compliance certification or an IT Grundschutz check and does not replace an audit. Missing evidence means that no supported configuration with a known assignment was detected in the evaluated dataset.

Note: Device-management evidence for selected Common Criteria, referenced by criterion ID with original summaries. A SOC 2 examination covers far more than device configuration; this mapping supports evidence collection only.

02 RESULTS

# Results Overview

Each selected control, its rolled up status, how many of its capabilities are evidenced, and where the supporting evidence is recorded.

| CONTROL | | STATUS | CAPABILITIES | EVIDENCE | PAGE |
|---|---|---|---|---|---|
| **CC6** | | | | 3 of 4 with evidence | |
| CC6.1 | Logical access controls | Supporting or partial evidence | 12 of 13 | 15 evidence items | n/a |
| CC6.6 | Protection against external threats | No recognized evidence | 0 of 2 | E-001 E-002 E-003 | 4 |
| CC6.7 | Restricted data movement | Supporting or partial evidence | 1 of 3 | E-004 E-005 | 5 |
| CC6.8 | Unauthorized software prevention | Supporting or partial evidence | 14 of 24 | 22 evidence items | n/a |
| **CC7** | | | | 0 of 1 with evidence | |
| CC7.1 | Vulnerability and configuration monitoring | Mixed policy evidence | 7 of 8 | 10 evidence items | n/a |

**3** Supporting or partial evidence **1** No recognized evidence **1** Mixed policy evidence

Sample report: detail pages are included for selected controls only (CC6.6, CC7.7). A full report includes a detail page for every control.

### HOW TO READ THIS REPORT

| | |
|---|---|
| Configuration evidence | Technical configuration evidence detected |
| Supporting or partial evidence | Technical configuration evidence partially detected |
| No recognized evidence | No supported technical configuration evidence detected |
| Mixed policy evidence | Mixed policy evidence |
| Not assessed | Not assessed |
| Outside selected scope | Outside selected scope |

1. Status is shown by marker shape and label, never by colour alone.
2. A control rolls up from its capabilities. A capability rolls up from its checks.
3. Only assigned policies count as evidence. Configured but unassigned settings are reported separately.
4. Evidence references point to rows of the evidence register in Appendix A.

ABOUT THE METHOD

# Methodology

Evidence is determined exclusively from concrete Intune settings: An assessment point is considered technically evidenced only when a recognized setting is configured with a recognized value and the policy is assigned. Configurations that explicitly contradict the target state are reported separately. Unsupported settings or settings that cannot be mapped unambiguously remain unassessed. Organizational requirements are not part of this automated technical assessment and must be assessed separately.

03 CONTROL DETAIL

CC6.6

No recognized evidence

# Protection against external threats

3 match, 1 missing, 0 different

**0 of 2 capabilities**

3 evidence references

## Host firewall (Windows Firewall) Windows

Setting configured, but not assigned

| CHECK | EXPECTED | ACTUAL | RESULT |
|---|---|---|---|
| Enable Domain Network Firewall<br>vendor_msft_firewall_mdmstore_domainprofile_enablefirewall<br>WIN - Defender Firewall - All profiles | True<br>"vendor_msft_firewall_mdmstore_domainprofile_enablefirewall_true" | **True**<br>"vendor_msft_firewall_mdmstore_domainprofile_enablefirewall_true" | Matches expected value |
| Enable Private Network Firewall<br>vendor_msft_firewall_mdmstore_privateprofile_enablefirewall<br>WIN - Defender Firewall - All profiles | True<br>"vendor_msft_firewall_mdmstore_privateprofile_enablefirewall_true" | **True**<br>"vendor_msft_firewall_mdmstore_privateprofile_enablefirewall_true" | Matches expected value |
| Enable Public Network Firewall<br>vendor_msft_firewall_mdmstore_publicprofile_enablefirewall<br>WIN - Defender Firewall - All profiles | True<br>"vendor_msft_firewall_mdmstore_publicprofile_enablefirewall_true" | **True**<br>"vendor_msft_firewall_mdmstore_publicprofile_enablefirewall_true" | Matches expected value |

POLICY **WIN - Defender Firewall - All profiles** Not assigned

EVIDENCE E-001 E-002 E-003

## Host firewall (macOS) macOS

No evidence

| CHECK | EXPECTED | ACTUAL | RESULT |
|---|---|---|---|
| Host firewall (macOS)<br>macos-firewall | true<br>true; alternative: true | *Not found* | Missing |

*No supported setting was found after checking the collected policies.*

POLICY No matching policy found

EVIDENCE None recorded

**Additional verification: not assessed by technical evidence**

These settings support part of this control. Remaining technical and organizational requirements need separate assessment.

CC6.7

Supporting or partial evidence

# Restricted data movement

1 match, 1 missing, 1 different

**1 of 3 capabilities**

2 evidence references

## Managed app data transfer restrictions (iOS) iOS

Setting configured and assigned

| CHECK | EXPECTED | ACTUAL | RESULT |
|---|---|---|---|
| Allowed Outbound Data Transfer Destinations<br>allowedOutboundDataTransferDestinations<br>iOS - APP - Corporate data | "managedApps" or "none" | **"managedApps"** | Matches expected value |

POLICY **iOS - APP - Corporate data** Assigned: Group: All Corporate Users

EVIDENCE E-004

## Managed app data transfer restrictions (Android) Android

No evidence

| CHECK | EXPECTED | ACTUAL | RESULT |
|---|---|---|---|
| Managed app data transfer restrictions (Android)<br>android-app-data-transfer | "managedApps" or "none" | *Not found* | Missing |

*No supported setting was found after checking the collected policies.*

POLICY No matching policy found

EVIDENCE None recorded

## Diagnostic data minimized (Windows) Windows

Deviating configuration detected

| CHECK | EXPECTED | ACTUAL | RESULT |
|---|---|---|---|
| Diagnostics Data Submission Mode<br>diagnosticsDataSubmissionMode<br>WIN - Device restrictions - Corporate | "none" | **"basic"** | Different value |

POLICY **WIN - Device restrictions - Corporate** Assigned: Group: All Corporate Devices

EVIDENCE E-005

**Risk E-005: WIN - Device restrictions - Corporate sets diagnosticsDataSubmissionMode to basic (assigned). Deviating configuration detected and assigned (risk).**

### Additional verification: not assessed by technical evidence

Data classification, all transfer channels, managed app scope and data-loss prevention effectiveness are unassessed.

APPENDIX A

# Appendix A: Evidence Register

Every configuration value cited in this report, as read from the tenant export. References are stable within a report ID.

| REF | POLICY | TYPE | SETTING | VALUE | ASSIGNMENT |
|---|---|---|---|---|---|
| E-001 | WIN - Defender Firewall - All profiles<br>0c0e7050-0000-4000-8000-000000000104; configuration; version unknown; modified 2026-09-29T11:15:00Z | Settings Catalog | Enable Domain Network Firewall<br>vendor_msft_firewall_mdmstore_domainprofile_enablefirewall | **True**<br>vendor_msft_firewall_mdmstore_domainprofile_enablefirewall_true | Not assigned |
| E-002 | WIN - Defender Firewall - All profiles<br>0c0e7050-0000-4000-8000-000000000104; configuration; version unknown; modified 2026-09-29T11:15:00Z | Settings Catalog | Enable Private Network Firewall<br>vendor_msft_firewall_mdmstore_privateprofile_enablefirewall | **True**<br>vendor_msft_firewall_mdmstore_privateprofile_enablefirewall_true | Not assigned |

*Referenced assessment points for each item of evidence are listed in the relevant sections.*

ANNEX

# Policy device status

Device counts as summarised by Intune for the device policies cited in this report. Context only: no status in this report depends on them, and they do not show the state of an individual device. Errors include devices reported as not compliant. No status reported means the Intune summary has no row for the policy, not a count of zero.

Status summaries read on 2026-10-08T09:00:00Z. Configuration report: collected. Compliance report: collected. Profile status overview: collected.

| POLICY | SOURCE | SUCCEEDED | ERRORS | CONFLICTS | NOT APPLICABLE | PENDING |
|---|---|---|---|---|---|---|
| WIN - Defender Firewall - All profiles | Configuration report | **415** | **2** | **1** | **5** | **n/a** |
| WIN - Device restrictions - Corporate | Profile status overview | **409** | **3** | **0** | **8** | **2** |
