Intune Documentation

SAMPLE REPORT, FICTIONAL TENANT

Technical Evidence Report: Intune Configuration

SOC 2

Trust Services Criteria

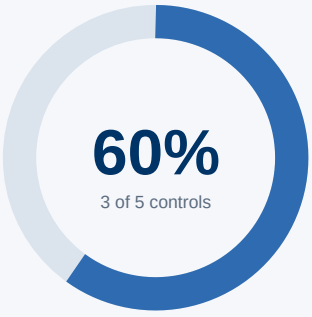
Evidence matrix for selected assessment points, read from the Microsoft Intune configuration

TENANT

Contoso Ltd

Report date **2026-10-08**

Classification **Internal**



Controls with supporting technical evidence

Supporting evidence only, not a compliance score

AT A GLANCE

Supporting or partial evidence	3
No recognized evidence	1
Mixed policy evidence	1

Evidence is read from the Microsoft Intune configuration export on the report date and mapped using ruleset 2026.10.8. Organizational aspects of each control are listed separately for review.

01 EXECUTIVE SUMMARY

Summary

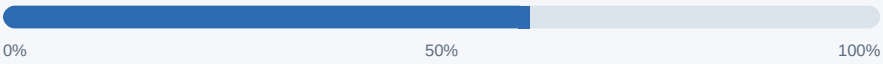
60%

CONTROLS WITH TECHNICAL EVIDENCE

3 of 5 assessable controls have supporting technical evidence in the Intune configuration.

34 of 50 technical safeguards are set up and switched on in Intune and Entra.

0 of 5 selected controls with configuration evidence (3 partial)
5 in scope; 0 outside the selected scope; 0 not assessed; 1 mixed policy evidence. Entries are selected mappings, not full framework coverage.



WITH TECHNICAL EVIDENCE	SAFEGUARDS IN PLACE	NO RECOGNIZED EVIDENCE	MIXED POLICY EVIDENCE
3	34	1	1
0 configuration, 3 supporting or partial	of 50 mapped, set up and switched on	controls without recognized evidence	controls with mixed policy evidence

Status distribution

5 controls

3 Supporting or partial evidence, 60% · 1 No recognized evidence, 20% · 1 Mixed policy evidence, 20%

Coverage by family

controls with technical evidence

CC6		3 of 4
CC7		0 of 1

Assigned deviating configurations: 3.
At least one assigned policy explicitly contradicts the target configuration.

Configured settings without assignment: 3.
The detected target configuration is not effective until it is assigned.

Key findings

ordered by severity, then control

Assigned deviation · CC6.7 See page 5

Diagnostic data minimized (Windows)
Assigned deviating configuration affects CC6.7.

Assigned deviation · CC6.8

Office macro runtime scanning for all documents
Assigned deviating configuration affects CC6.8.

Assigned deviation · CC7.1 **Quality update timing within 14 days: Assigned deviating configuration affects CC7.1.**

Not assigned · CC6.6 **Host firewall (Windows Firewall): Configured setting without assignment affects CC6.6.** See page 4

Not assigned · CC6.8 **System Integrity Protection: Configured setting without assignment affects CC6.8.**

1 further finding is listed in the full report.

SCOPE NOTE

This report documents technical evidence from the tenant's Microsoft Intune configuration. It is not a compliance certification and does not replace an audit. Missing evidence means that no supported configuration with a known assignment was detected in the evaluated dataset.

Note: Device-management evidence for selected Common Criteria, referenced by criterion ID with original summaries. A SOC 2 examination covers far more than device configuration; this mapping supports evidence collection only.

02 RESULTS

Results Overview

Each selected control, its rolled up status, how many of its capabilities are evidenced, and where the supporting evidence is recorded.

CONTROL		STATUS	CAPABILITIES	EVIDENCE	PAGE
CC6				3 of 4 with evidence	
CC6.1	Logical access controls	Supporting or partial evidence	12 of 13	15 evidence items	n/a
CC6.6	Protection against external threats	No recognized evidence	0 of 2	E-001 E-002 E-003	4
CC6.7	Restricted data movement	Supporting or partial evidence	1 of 3	E-004 E-005	5
CC6.8	Unauthorized software prevention	Supporting or partial evidence	14 of 24	22 evidence items	n/a
CC7				0 of 1 with evidence	
CC7.1	Vulnerability and configuration monitoring	Mixed policy evidence	7 of 8	10 evidence items	n/a

3 Supporting or partial evidence **1** No recognized evidence **1** Mixed policy evidence

Sample report: detail pages are included for selected controls only (CC6.6, CC7.7). A full report includes a detail page for every control.

HOW TO READ THIS REPORT

Configuration evidence	Technical configuration evidence detected
Supporting or partial evidence	Technical configuration evidence partially detected
No recognized evidence	No supported technical configuration evidence detected
Mixed policy evidence	Mixed policy evidence
Not assessed	Not assessed
Outside selected scope	Outside selected scope

1. Status is shown by marker shape and label, never by colour alone.
2. A control rolls up from its capabilities. A capability rolls up from its checks.
3. Only assigned policies count as evidence. Configured but unassigned settings are reported separately.
4. Evidence references point to rows of the evidence register in Appendix A.

ABOUT THE METHOD

Methodology

Evidence is determined exclusively from concrete Intune settings: An assessment point is considered technically evidenced only when a recognized setting is configured with a recognized value and the policy is assigned. Configurations that explicitly contradict the target state are reported separately. Unsupported settings or settings that cannot be mapped unambiguously remain unassessed. Organizational requirements are not part of this automated technical assessment and must be assessed separately.

03 CONTROL DETAIL

CC6.6

No recognized evidence

Protection against external threats

3 match, 1 missing, 0 different

0 of 2 capabilities

3 evidence references

Host firewall (Windows Firewall) Windows

Setting configured, but not assigned

CHECK	EXPECTED	ACTUAL	RESULT
Enable Domain Network Firewall vendor_msft_firewall_mdmstore_domainprofile_enablefirewall WIN - Defender Firewall - All profiles	True "vendor_msft_firewall_mdmstore_domainprofile_enablefirewall_true"	**True** "vendor_msft_firewall_mdmstore_domainprofile_enablefirewall_true"	Matches expected value
Enable Private Network Firewall vendor_msft_firewall_mdmstore_privateprofile_enablefirewall WIN - Defender Firewall - All profiles	True "vendor_msft_firewall_mdmstore_privateprofile_enablefirewall_true"	**True** "vendor_msft_firewall_mdmstore_privateprofile_enablefirewall_true"	Matches expected value
Enable Public Network Firewall vendor_msft_firewall_mdmstore_publicprofile_enablefirewall WIN - Defender Firewall - All profiles	True "vendor_msft_firewall_mdmstore_publicprofile_enablefirewall_true"	**True** "vendor_msft_firewall_mdmstore_publicprofile_enablefirewall_true"	Matches expected value

POLICY **WIN - Defender Firewall - All profiles** Not assigned

EVIDENCE E-001 E-002 E-003

Host firewall (macOS) macOS

No evidence

CHECK	EXPECTED	ACTUAL	RESULT
Host firewall (macOS) macos-firewall	true true; alternative: true	*Not found*	Missing

No supported setting was found after checking the collected policies.

POLICY No matching policy found

EVIDENCE None recorded

Additional verification: not assessed by technical evidence

These settings support part of this control. Remaining technical and organizational requirements need separate assessment.

CC6.7

Supporting or partial evidence

Restricted data movement

1 match, 1 missing, 1 different

1 of 3 capabilities

2 evidence references

Managed app data transfer restrictions (iOS) iOS

Setting configured and assigned

CHECK	EXPECTED	ACTUAL	RESULT
Allowed Outbound Data Transfer Destinations allowedOutboundDataTransferDestinations iOS - APP - Corporate data	"managedApps" or "none"	**"managedApps"**	Matches expected value

POLICY **iOS - APP - Corporate data** Assigned: Group: All Corporate Users

EVIDENCE E-004

Managed app data transfer restrictions (Android) Android

No evidence

CHECK	EXPECTED	ACTUAL	RESULT
Managed app data transfer restrictions (Android) android-app-data-transfer	"managedApps" or "none"	*Not found*	Missing

No supported setting was found after checking the collected policies.

POLICY No matching policy found

EVIDENCE None recorded

Diagnostic data minimized (Windows) Windows

Deviating configuration detected

CHECK	EXPECTED	ACTUAL	RESULT
Diagnostics Data Submission Mode diagnosticsDataSubmissionMode WIN - Device restrictions - Corporate	"none"	**"basic"**	Different value

POLICY **WIN - Device restrictions - Corporate** Assigned: Group: All Corporate Devices

EVIDENCE E-005

Risk E-005: WIN - Device restrictions - Corporate sets diagnosticsDataSubmissionMode to basic (assigned). Deviating configuration detected and assigned (risk).

Additional verification: not assessed by technical evidence

Data classification, all transfer channels, managed app scope and data-loss prevention effectiveness are unassessed.

APPENDIX A

Appendix A: Evidence Register

Every configuration value cited in this report, as read from the tenant export. References are stable within a report ID.

REF	POLICY	TYPE	SETTING	VALUE	ASSIGNMENT

Referenced assessment points for each item of evidence are listed in the relevant sections.

ANNEX

Policy device status

Device counts as summarised by Intune for the device policies cited in this report. Context only: no status in this report depends on them, and they do not show the state of an individual device. Errors include devices reported as not compliant. No status reported means the Intune summary has no row for the policy, not a count of zero.

Status summaries read on 2026-10-08T09:00:00Z. Configuration report: collected. Compliance report: collected. Profile status overview: collected.

POLICY	SOURCE	SUCCEEDED	ERRORS	CONFLICTS	NOT APPLICABLE	PENDING
