

Technical Evidence Report: Intune Configuration

Def Stan 05-138

Issue 4

Evidence matrix for selected assessment points, read from the Microsoft Intune configuration

TENANT

Contoso LtdReport date **2026-10-08**Classification **Internal****Controls with supporting technical evidence**

Supporting evidence only, not a compliance score

AT A GLANCE

● Supporting or partial evidence	7
○ No recognized evidence	1

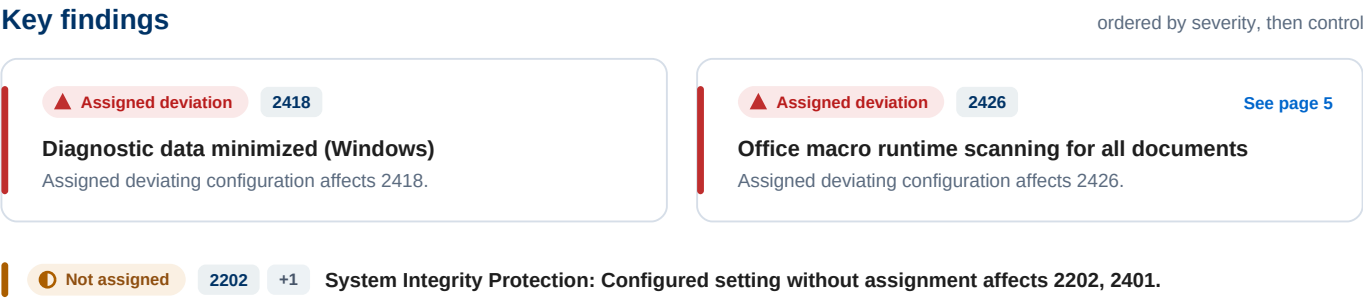

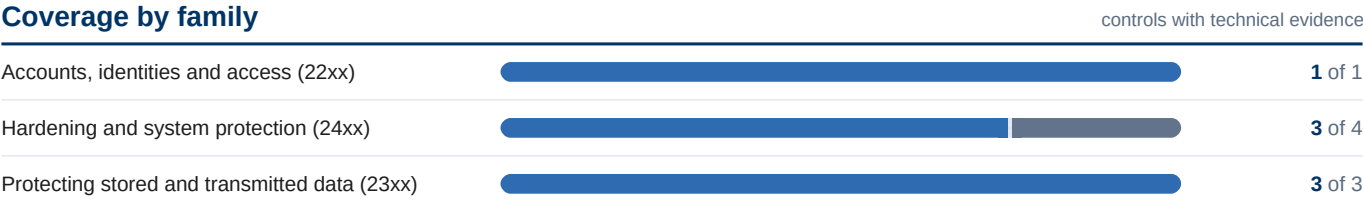

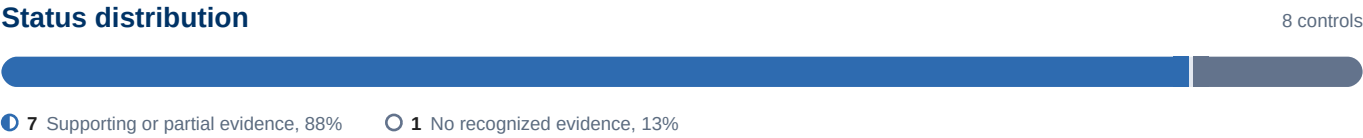

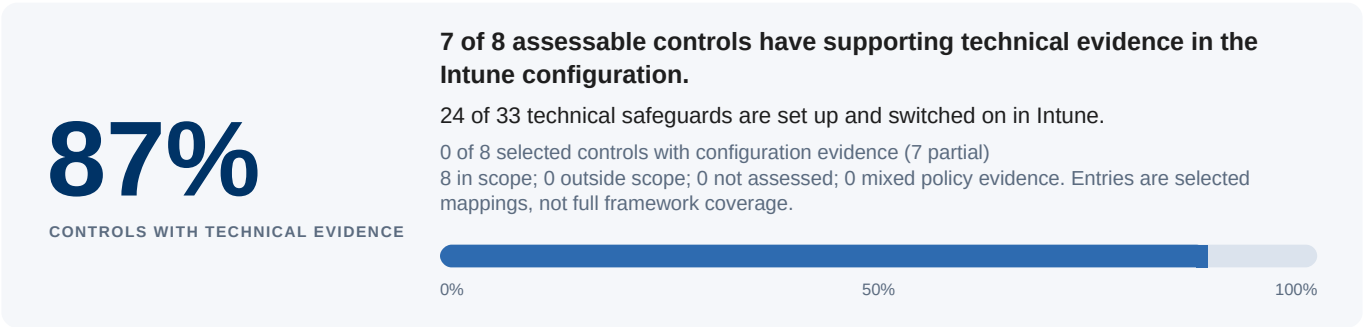

Evidence is read from the Microsoft Intune configuration export on the report date and mapped using ruleset 2026.10.2. Organizational aspects of each control are listed separately for review.

DOCUMENT CONTROL

Framework UK MOD Def Stan 05-138 Issue 4		Tenant Contoso Ltd	Prepared for Information Security

Classification Internal	Report date 2026-10-08		

01 EXECUTIVE SUMMARY

Summary

SCOPE NOTE

This report documents technical evidence from the tenant's Microsoft Intune configuration. It is not a compliance certification or an IT Grundschutz check and does not replace an audit. Missing evidence means that no supported configuration with a known assignment was detected in the evaluated dataset.

Note: Device-management evidence for selected Objective B controls of Def Stan 05-138 Issue 4, referenced by control identifier with original summaries and the Cyber Risk Profile levels at which each applies. Cyber Essentials certification (control 0001) is required at every level and cannot be evidenced from device configuration.

02 RESULTS

Results Overview

Each selected control, its rolled up status, how many of its capabilities are evidenced, and where the supporting evidence is recorded.

CONTROL	STATUS	CAPABILITIES	EVIDENCE	PAGE
Accounts, identities and access (22xx)				1 of 1 with evidence
2202 Trusted managed devices	Supporting or partial evidence	4 of 7	6 evidence items	n/a
Hardening and system protection (24xx)				3 of 4 with evidence
2401 Platform integrity protections	No recognized evidence	0 of 3	1 evidence item	n/a
2405 Operating system update enforcement	Supporting or partial evidence	5 of 5	6 evidence items	n/a
2418 Managed hardening baselines	Supporting or partial evidence	9 of 13	11 evidence items	n/a
2426 Real-time anti-malware protection	Supporting or partial evidence	1 of 2	E-007E-008+2	5
Protecting stored and transmitted data (23xx)				3 of 3 with evidence
2309 Data on mobile devices	Supporting or partial evidence	2 of 2	2 evidence items	n/a
2317 Full disk encryption on endpoints	Supporting or partial evidence	3 of 3	E-001E-002+4	4
2322 Mobile device management	Supporting or partial evidence	6 of 7	7 evidence items	n/a

7

 Supporting or partial evidence

1

 No recognized evidence

Sample report: detail pages are included for selected controls only (2317, 2426). A full report includes a detail page for every control.

HOW TO READ THIS REPORT

● Configuration evidence

● Supporting or partial evidence

○ No recognized evidence

▲ Mixed policy evidence

▲ Not assessed

○ Outside selected scope

Technical configuration evidence detected

Technical configuration evidence partially detected

No supported technical configuration evidence detected

Mixed policy evidence

Not assessed

Outside selected scope

1. Status is shown by marker shape and label, never by colour alone.

2. A control rolls up from its capabilities. A capability rolls up from its checks.

3. Only assigned policies count as evidence. Configured but unassigned settings are reported separately.

4. Evidence references point to rows of the evidence register in Appendix A.

ABOUT THE METHOD

Methodology

Evidence is determined exclusively from concrete Intune settings: An assessment point is considered technically evidenced only when a recognized setting is configured with a recognized value and the policy is assigned. Configurations that explicitly contradict the target state are reported separately. Unsupported settings or settings that cannot be mapped unambiguously remain unassessed. Organizational requirements are not part of this automated technical assessment and must be assessed separately.

03 CONTROL DETAIL

2317

Supporting or partial evidence

Level 1 to Level 3

3 of 3 capabilities

6 evidence references

Full disk encryption on endpoints

6 match, 0 missing, 0 different

Disk encryption (BitLocker) Windows

Setting configured and assigned

CHECK	EXPECTED	ACTUAL	RESULT
Require Device Encryption device_vendor_msft_bitlocker_requireddeviceencryption WIN - Baseline - BitLocker	Enabled "device_vendor_msft_bitlocker_requireddeviceencryption_1"	Enabled "device_vendor_msft_bitlocker_requideviceencryption_1"	Matches expected value
BitLocker Enabled bitLockerEnabled WIN - Compliance - Baseline	true	true	Matches expected value

POLICY

WIN - Baseline - BitLocker

Assigned: Group: All Corporate Devices, Excluded: Group: Kiosk Devices

POLICY

WIN - Compliance - Baseline

Assigned: Group: All Corporate Devices

EVIDENCE

E-001

E-002

Compliance requirement, not an observed device state. Marks noncompliant after 24 hours. Resource access depends on applicable Conditional Access policies; effective access is unverified.

Disk encryption (FileVault) macOS

Setting configured and assigned

CHECK	EXPECTED	ACTUAL	RESULT
Enable com.apple.mcx.filevault2_enable MAC - FileVault enforcement	On "com.apple.mcx.filevault2_enable_0"	On "com.apple.mcx.filevault2_enable_0"	Matches expected value
Force Enable In Setup Assistant com.apple.mcx.filevault2_forceenableinsetupassistant MAC - FileVault enforcement	True "com.apple.mcx.filevault2_forceenableinsetupassistant_true"	True "com.apple.mcx.filevault2_forceenableinsetupassistant_true"	Matches expected value
Storage Require Encryption storageRequireEncryption MAC - Compliance - Baseline	true	true	Matches expected value

POLICY

MAC - FileVault enforcement

Assigned: Group: Corporate Mac Devices

POLICY

MAC - Compliance - Baseline

Assigned: Group: Corporate Mac Devices

EVIDENCE

E-003

E-004

E-005

Compliance requirement, not an observed device state. Marks noncompliant after 24 hours. Resource access depends on applicable Conditional Access policies; effective access is unverified.

Storage encryption (Android) Android

Compliance requirement assigned

CHECK	EXPECTED	ACTUAL	RESULT
Storage Require Encryption storageRequireEncryption AND - Compliance - Work profile	true	true	Matches expected value

POLICY

AND - Compliance - Work profile

Assigned: Group: Corporate Mobile Devices

EVIDENCE

E-006

2317 (continued)

Compliance requirement, not an observed device state. Marks noncompliant after 24 hours. Resource access depends on applicable Conditional Access policies; effective access is unverified.

▲ **Additional verification: not assessed by technical evidence**

These settings support part of this control. Remaining technical and organizational requirements need separate assessment.

2426

Supporting or partial evidence

Level 1 to Level 3

Real-time anti-malware protection

3 match, 0 missing, 1 different
