

Technical Evidence Report: Intune Configuration

NIST SP 800-53

Revision 5

Evidence matrix for selected assessment points, read from the Microsoft Intune configuration

TENANT

Contoso LtdReport date **2026-10-08**Classification **Internal****Controls with supporting technical evidence**

Supporting evidence only, not a compliance score

AT A GLANCE

① Supporting or partial evidence	8
○ No recognized evidence	1
▲ Mixed policy evidence	1

Evidence is read from the Microsoft Intune configuration export on the report date and mapped using ruleset 2026.10.3. Organizational aspects of each control are listed separately for review.

DOCUMENT CONTROL

Framework NIST SP 800-53 Revision 5		Tenant Contoso Ltd	Prepared for Information Security
Prepared by Endpoint Engineering	Report ID IDOC-N53-20261008-CTSO	Revision 1.0	Ruleset version 2026.10.3
Classification Internal	Report date 2026-10-08		

01 EXECUTIVE SUMMARY

Summary

SCOPE NOTE

This report documents technical evidence from the tenant's Microsoft Intune configuration. It is not a compliance certification or an IT Grundschutz check and does not replace an audit. Missing evidence means that no supported configuration with a known assignment was detected in the evaluated dataset.

02 RESULTS

Results Overview

Each selected control, its rolled up status, how many of its capabilities are evidenced, and where the supporting evidence is recorded.

CONTROL	STATUS	CAPABILITIES	EVIDENCE	PAGE
AC Access Control				1 of 1 with evidence
AC-2 Account Management	Supporting or partial evidence	1 of 1	1 evidence item	n/a
CM Configuration Management				3 of 3 with evidence
CM-6 Configuration Settings	Supporting or partial evidence	7 of 11	9 evidence items	n/a
CM-7 Least Functionality	Supporting or partial evidence	8 of 11	9 evidence items	n/a
CM-11 User-Installed Software	Supporting or partial evidence	1 of 4	2 evidence items	n/a
IA Identification and Authentication				1 of 1 with evidence
IA-5 Authenticator Management	Supporting or partial evidence	8 of 9	8 evidence items	n/a
SC System and Communications Protection				1 of 2 with evidence
SC-7 Boundary Protection	No recognized evidence	0 of 2	E-001 E-002 E-003	4
SC-28 Protection of Information at Rest	Supporting or partial evidence	3 of 3	E-004 E-005 +4	5
SI System and Information Integrity				2 of 3 with evidence
SI-2 Flaw Remediation	Mixed policy evidence	5 of 6	8 evidence items	n/a
SI-3 Malicious Code Protection	Supporting or partial evidence	5 of 6	9 evidence items	n/a
SI-7 Software, Firmware, and Information Integrity	Supporting or partial evidence	3 of 7	5 evidence items	n/a

8 Supporting or partial evidence 1 No recognized evidence 1 Mixed policy evidence

Sample report: detail pages are included for selected controls only (SC-7, SC-28). A full report includes a detail page for every control.

HOW TO READ THIS REPORT

● Configuration evidence

● Supporting or partial evidence

○ No recognized evidence

▲ Mixed policy evidence

▲ Not assessed

○ Outside selected scope

Technical configuration evidence detected

Technical configuration evidence partially detected

No supported technical configuration evidence detected

Mixed policy evidence

Not assessed

Outside selected scope

1. Status is shown by marker shape and label, never by colour alone.

2. A control rolls up from its capabilities. A capability rolls up from its checks.

3. Only assigned policies count as evidence. Configured but unassigned settings are reported separately.

4. Evidence references point to rows of the evidence register in Appendix A.

03 CONTROL DETAIL

SC-7

No recognized evidence

Boundary Protection

3 match, 1 missing, 0 different

3 evidence references

Host firewall (Windows Firewall) Windows

Setting configured, but not assigned

CHECK	EXPECTED	ACTUAL	RESULT
Enable Domain Network Firewall vendor_msft_firewall_mdmstore_domainprofile_enablefirewall WIN - Defender Firewall - All profiles	True "vendor_msft_firewall_mdmstore_domainprofile_enablefirewall_true"	True "vendor_msft_firewall_mdmstore_domainprofile_enablefirewall_true"	Matches expected value
Enable Private Network Firewall vendor_msft_firewall_mdmstore_privateprofile_enablefirewall WIN - Defender Firewall - All profiles	True "vendor_msft_firewall_mdmstore_privateprofile_enablefirewall_true"	True "vendor_msft_firewall_mdmstore_privateprofile_enablefirewall_true"	Matches expected value
Enable Public Network Firewall vendor_msft_firewall_mdmstore_publicprofile_enablefirewall WIN - Defender Firewall - All profiles	True "vendor_msft_firewall_mdmstore_publicprofile_enablefirewall_true"	True "vendor_msft_firewall_mdmstore_publicprofile_enablefirewall_true"	Matches expected value

POLICY

WIN - Defender Firewall - All profiles

Not assigned

EVIDENCE

E-001

E-002

E-003

Host firewall (macOS) macOS

No evidence

CHECK	EXPECTED	ACTUAL	RESULT
Host firewall (macOS) macos-firewall	true true; alternative: true	Not found	Missing

No supported setting was found after checking the collected policies.

POLICY

No matching policy found

EVIDENCE

None recorded

Additional verification: not assessed by technical evidence

These settings support part of this control. Remaining technical and organizational requirements need separate assessment.

SC-28

Supporting or partial evidence

Protection of Information at Rest

6 match, 0 missing, 0 different

3 of 3 capabilities

6 evidence references

Disk encryption (BitLocker) Windows

Setting configured and assigned

CHECK	EXPECTED	ACTUAL	RESULT
Require Device Encryption device_vendor_msft_bitlocker_requireddeviceencryption WIN - Baseline - BitLocker	Enabled "device_vendor_msft_bitlocker_requireddeviceencryption_1"	Enabled "device_vendor_msft_bitlocker_requireddeviceencryption_1"	Matches expected value
BitLocker Enabled bitLockerEnabled WIN - Compliance - Baseline	true	true	Matches expected value

POLICY

WIN - Baseline - BitLocker

Assigned: Group: All Corporate Devices, Excluded: Group: Kiosk Devices

POLICY

WIN - Compliance - Baseline

Assigned: Group: All Corporate Devices

EVIDENCE

E-004

E-005

Compliance requirement, not an observed device state. Marks noncompliant after 24 hours. Resource access depends on applicable Conditional Access policies; effective access is unverified.

Disk encryption (FileVault) macOS

Setting configured and assigned

CHECK	EXPECTED	ACTUAL	RESULT
Enable com.apple.mcx.filevault2_enable MAC - FileVault enforcement	On "com.apple.mcx.filevault2_enable_0"	On "com.apple.mcx.filevault2_enable_0"	Matches expected value
Force Enable In Setup Assistant com.apple.mcx.filevault2_forceenableinsetupassistant MAC - FileVault enforcement	True "com.apple.mcx.filevault2_forceenableinsetupassistant_true"	True "com.apple.mcx.filevault2_forceenableinsetupassistant_true"	Matches expected value
Storage Require Encryption storageRequireEncryption MAC - Compliance - Baseline	true	true	Matches expected value

POLICY

MAC - FileVault enforcement

Assigned: Group: Corporate Mac Devices

POLICY

MAC - Compliance - Baseline

Assigned: Group: Corporate Mac Devices

EVIDENCE

E-006

E-007

E-008

Compliance requirement, not an observed device state. Marks noncompliant after 24 hours. Resource access depends on applicable Conditional Access policies; effective access is unverified.

Storage encryption (Android) Android

Compliance requirement assigned

CHECK	EXPECTED	ACTUAL	RESULT
Storage Require Encryption storageRequireEncryption AND - Compliance - Work profile	true	true	Matches expected value

POLICY

AND - Compliance - Work profile

Assigned: Group: Corporate Mobile Devices

EVIDENCE

E-009

Compliance requirement, not an observed device state. Marks noncompliant after 24 hours. Resource access depends on applicable Conditional Access policies; effective access is unverified.

SC-28 (continued)

Referenced assessment points for each item of evidence are listed in the relevant sections.

APPENDIX B

Methodology

Evidence is determined exclusively from concrete Intune settings: An assessment point is considered technically evidenced only when a recognized setting is configured with a recognized value and the policy is assigned. Configurations that explicitly contradict the target state are reported separately. Unsupported settings or settings that cannot be mapped unambiguously remain unassessed. Organizational requirements are not part of this automated technical assessment and must be assessed separately.

Note: Device-management evidence for a subset of technical controls. Organizational and procedural aspects of each control are out of scope for an Intune tenant export.
